Full stack software engineer with 14 years of experience specializing in frontend architecture, UI/UX design, and project leadership.

Experience

Perficient

Senior Technical Architect
New York, NY / 2020 – Present

- Design, prototype, and pitch a full-stack architecture and design system using React and Spring leading to a \$5 million contract with a large pharmaceutical company to develop a pharmacokinetic clinical trial analysis application used to determine drug dosages, including the COVID-19 vaccine.
- Initiate development of frontend architecture standards, contribution guide, and design system, accelerating onboarding and delivery timelines.
- Coach and mentor junior colleagues in their professional growth journeys earning a reputation for developing talent and creating highly productive technical leaders with a focus on user experience and maintainable architectures.

Project Manager
Baltimore, MD / 2014 – 2020

- Lead full project lifecycle from discovery sessions through implementation for a 12-person agile team building an analytics and sales platform for a major insurance broker, using Angular, .NET, and Azure cloud services, generating a 75% reduction in market research costs.
- Liaise with client executives, author RFPs and SOWs, and provide pre-sales leadership as an expert communicator able to dissect complex data and situations into actionable information, leading to multi-million-dollar engagements and contract wins.

Lead Technical Consultant / Associate
Washington, DC / 2007 – 2014

- Produce a custom horizontally scaled system with C#, Redis, and SQL Studio to migrate over one billion documents using dozens of servers and hundreds of instances within a three-week timeframe and saving client \$3 million across five years in end-of-life extended software support.

Education

University of Virginia
